

Available immediately, we offer a position as

# Project Manager Digital Business Models (m/f/d)

## About us

We support companies in developing a digital strategy and opening up new markets with innovative digital products. Together with our members and partners, we develop digital business models or sales strategies for digital services and support the application of machine learning in production. In our unique infrastructure on the RWTH Aachen Campus with innovation laboratories and a demonstration factory, we build prototypes together with our community to test new digital services directly with potential customers.

## What we offer

- An innovative and modern working environment in which expertise and responsibility are valued
- Varied and responsible tasks in current topics of digitisation of the industry
- Collaboration with and in a young, motivated multidisciplinary team with the shared goal of driving the Center Smart Services forward
- Rapid Prototyping: We do not just think of new ideas theoretically, we also test them right away! We get things done!
- Passion for success: We are not satisfied with mediocrity, but want to achieve the best possible for us and our community members!

## Your responsibilities

Acquisition, processing and management of (inter-)national projects with industrial and research partners, consulting of leading industrial companies in the areas of digitisation strategy, smart services, business model development and distribution of digital solutions, development of new offers for our service portfolio in the areas of research & development, consulting and further education.

## What we expect

- A very good university degree (diploma or master's degree) in industrial engineering, mechanical engineering, electrical engineering, computer science, business administration or a related discipline
- High commitment and commitment, curiosity and motivation
- Enjoy working in a young motivated team
- Very good analytical and communicative skills
- Strong entrepreneurial thinking and action from day one
- Excellent knowledge of German and very good knowledge of English (spoken and written)

We look forward to receiving your application including a cover letter, CV and academic and work certificates via E-Mail to:
